

CONDITIONAL: closed S^3 parent and action-owned sector
OPEN: background normalization and local matrix elements

DERIVED on a regular common domain
Constraints / gauge quotient $\rightarrow$ physical Hessian $\rightarrow$ Schur reduction

CONDITIONAL: select one normalized physical $n = 2$ profile
DERIVED: $X_2 = (q_2, \Pi_2)$; exact dipole $\sin(2\psi) \hat{n} \cdot \hat{p}$

DERIVED for fixed response: one state $\rightarrow$ induced metric
Growth / Weyl-lensing / fixed-redshift distance / Jacobi-Sachs optics

CONDITIONAL prospective gate A
One shared two-component state

CONDITIONAL prospective gate B
One coherent global amplitude

OPEN: state direction, seam export, source statistics and joint covariance
DERIVED: isolated covariance rank $\leq m$ for m coherent amplitudes
